To Greenhill, the woven leather lends this chair a masculine feel. “The seat gives a little, so it’s really comfortable,” she says. Eisner likes the mix of black steel and brown leather, and admires how light shines through the straps. “I would pair this with a glass-top table, so you can see the weaving,” he suggests. Other leather options and steel finishes are offered. 19" w. x 21" d. x 32" h.; \$1,410; suinteny.com
